Patella Medical Ltd.

is a 100% Hungarian-owned company manufacturing medical devices. For more than 15 years, we have been engaged in the development, production, and distribution of incontinence systems – including adult diapers and bed pads. Over the years, our products have been chosen with complete satisfaction by both users and healthcare professionals, whether it's our pants, slip, baby diaper, or bed pad product lines.

We are proud that our diapers and underpads are not only well-recognized among customers but also regularly recommended by doctors and nurses. Thanks to health insurance support, they are also available by prescription.

Our production takes place in Hungary using state-of-the-art technology and high-quality, skin-friendly raw materials. As a result, our products are reliable, comfortable, and safe, meeting the highest quality standards.

We are committed to offering, under the GM brand name, diapers and bed pads that make daily care easier – both for healthcare institutions and for home caregivers.

Precise manufacturing technology – reliable results

Every stage of our production is strictly regulated and equipped with modern technology and comprehensive quality assurance. Our goal is to provide our partners with consistently high-quality medical products.

1

Our manufacturing processes are carried out in controlled environments, following the strictest medical and hygiene regulations.

2

Our modern, automated production technology ensures consistent product quality and precise manufacturing.

3

Our multi-stage quality control system guarantees that every finished product is clean, safe, and reliable.

GM Incontinence Product Line

GM Slip Adult Diaper

UNISEX

Thanks to their comfortable, breathable design and reliable absorbency, **GM Slip adult diapers** are ideal for active daytime use, as well as for moderate to severe incontinence. The night model offers increased absorbent capacity, effectively capturing and retaining moisture to prevent leakage, ensuring comfortable and restful sleep.

GM Slip adult diapers feature a soft, skin-friendly inner layer, a wetness indicator strip, and a three-layer breathable structure. Available in multiple sizes and unisex designs for everyday safety and comfort.

Three-layer diaper structure

SOFT INNER LAYER
Gently conforms to the skin; its non-woven material quickly channels moisture toward the absorbent core.

MIDDLE ABSORBENT PULP CORE
Made of fluffy pulp and superabsorbent polymers that can bind and retain large amounts of liquid securely.

OUTER PROTECTIVE LAYER
Breathable, waterproof polyethylene film that prevents leakage while allowing skin ventilation.

Adjustable straps:
allow for a personalized, secure fit and can be refastened multiple times.

Flexible waistband:
ensures comfortable fit, follows body movements, and helps prevent leakage.

Tailored leg cut:
anatomically designed for a secure, comfortable fit and reliable leak protection.

Moisture indicator strip:
shows when the diaper needs changing without opening it. When the diaper becomes soiled or wet, the strip changes color—an intelligent, economical, and reassuring solution.

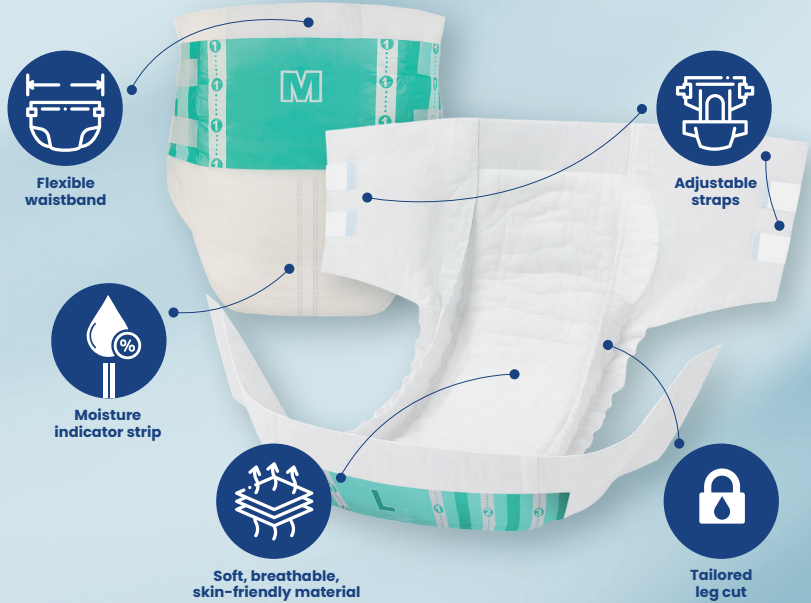

Unisex design:
available in sizes S–XL, ensuring a comfortable, secure fit for all body types.

Day and night versions:
the daytime diaper is discreet and comfortable for active use, while the night version—with an absorption capacity of up to 3730 ml—provides long-lasting protection and a dignified, peaceful night's rest.

Packaging:
30 pcs / pack

The breathable structure of GM Slip adult diapers enhances comfort, reduces the risk of skin irritation, and helps prevent dermatological problems. The discreet, flexible fit and elastic waistband provides reliable support while effectively preventing leakage.

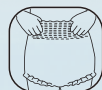

GM Pants Adult Diaper

The **GM Pants adult pull-up diaper** provides safe, comfortable, and discreet protection against incontinence, with a flexible, body-contouring design. Its anatomical shape ensures easy wearing, a secure fit, and freedom of movement for an active daily life.

Made from soft, breathable, skin-friendly materials that promote natural skin ventilation while offering reliable protection against moisture.

The GM Pants pull-up diaper is available in multiple sizes (S–L) in a unisex design, with standard and extra absorbent versions – suitable for both daytime and nighttime use. It provides a reliable and comfortable solution for discreet management of incontinence, perfectly suited to a modern, active lifestyle.

**Flexible waistband:**

The soft, stretchable waistband provides a stable, discreet fit, following body contours comfortably while helping to prevent leaks.

**Tailored leg cut:**

Anatomically designed for precise fit, minimizing the risk of leakage and ensuring long-term comfort.

**Moisture indicator strip:**

The external strip changes color when the diaper needs changing—supporting hygienic, economical use and helping protect the skin.

**Breathable, skin-friendly material:**

Promotes natural air circulation, keeps the skin dry, and reduces irritation or redness.

**Easy removal:**

Tear-away side seams allow quick, hygienic removal—facilitating care and daily use.

**Unisex design:**

available in sizes S–L, offering a comfortable and secure fit for all body types.

**Packaging:**

15–30 pcs / pack (depending on size)

User-friendly design:

Easy to pull on like regular underwear, making it especially convenient for everyday use. Its discreet, elastic structure ensures natural freedom of movement and confident wear.

GM Baby-Child Diaper

UNISEX

The **GM Baby-Child Diaper** is a reliable, single-use, adhesive-tape diaper designed for children's comfort and skin protection.

Its soft, breathable, skin-friendly materials ensure lasting dryness while effectively protecting the skin from irritation and redness. The flexible waistband and adjustable adhesive tabs provide a perfect fit for every movement.

Thanks to its unique **double safety pocket**, the diaper features specially shaped front and back barriers that offer extra protection against sudden, larger liquid releases. The pocket structure prevents moisture from shifting, keeping the diaper dry even during sleep or movement. Available in three sizes, ideal for every stage of development.

**Adhesive-tape design:**

Side tabs allow precise adjustment, easy application and removal, and can be repositioned multiple times. Secure fastening while gentle on the skin.

**Front and back security pockets:**

Special design prevents leakage – double security pockets keep liquids inside even in larger quantities.

**Anatomically tailored leg cut:**

Follow the body's contours for comfortable wear and effective leakage protection. Flexible, non-woven side barriers provide lateral protection during movement or sleep.

**Flexible waistband:**

Soft and stretchable, adapting to the child's movements.

**Breathable, skin-friendly material:**

Promotes natural air circulation, keeps the skin dry, and reduces irritation and redness.

**Moisture indicator strip:**

The external strip changes color when a change is needed – supporting hygienic, economical use and preventing skin irritation.

**Unisex design:**

Suitable for both boys and girls, offering secure and comfortable fit for all body types.

GM Antidecubitus Underpad

The **GM Antidecubitus Underpad** is designed for individuals with limited mobility, or those who are permanently bedridden or seated.

It provides comfort while helping prevent pressure sores, contributing to skin integrity and maintaining a hygienic care environment.

Its multilayer, high-absorbency structure offers reliable protection for both user and surroundings, while its waterproof yet breathable backing promotes natural skin ventilation.

Ideal for patient care at home, in healthcare facilities, or in social care institutions.

The fluffy core provides strong protection against incontinence.

The breathable backing prevents leakage.

The framed side design further helps prevent liquid from escaping.

Materials: Non-woven + Tissue + Fluff (SAP) + Tissue + PE Film

The surface layer is a woven, non-woven top sheet that allows rapid fluid transfer into the absorbent core.

The diamond-shaped pattern ensures enhanced protection and faster urine absorption.

Made of multilayer, water-permeable material with high absorbency and reliable leak protection. Provides protection for both user and environment, ensuring a hygienic, dry care setting.

Available in four sizes and packaging options.
